

Welcome To The Gateway of Student Performance Analysis!

Unlock the power of data-driven insights with our innovative platform designed for engineering students. Dive into comprehensive performance analytics, track your progress, and elevate your academic journey.

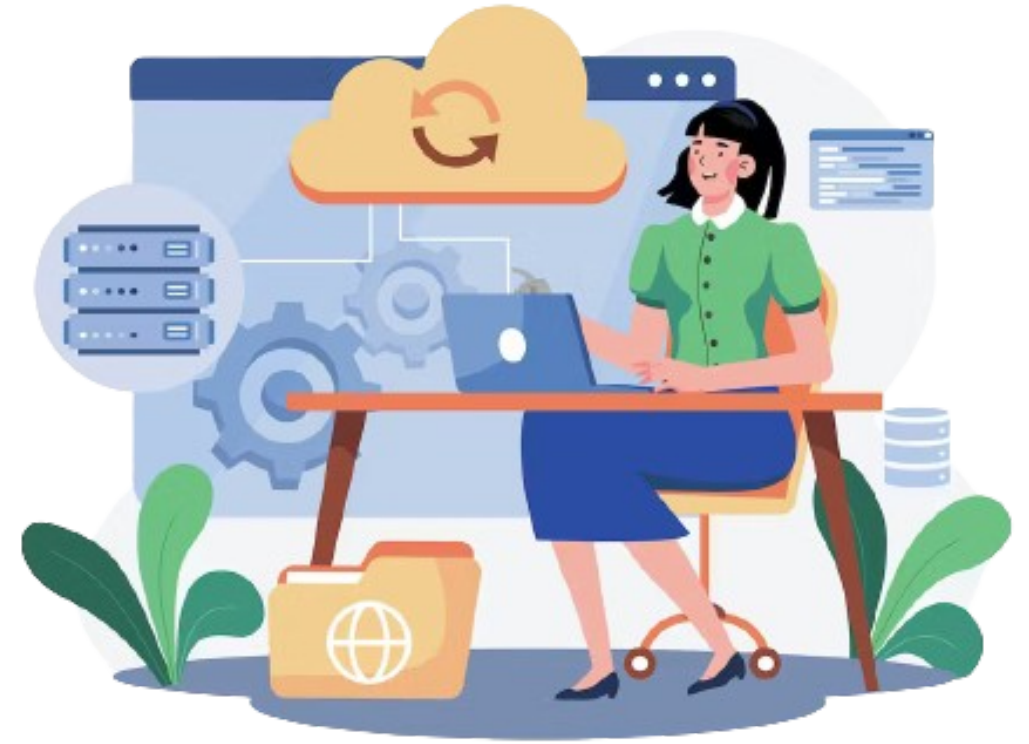

Get Started

Let's Progress

Where Progress Meets Potential...!!

Recognizing the common aspiration for high performance among college students, we understand the challenges arising from inadequate analysis of their performance. Through our platform, users not only gain valuable insights but also have the opportunity to build a robust profile by adding certificates and other career-building elements. This also benefits colleges to effectively track and manage student records. So, join us in the journey of academic advancement and professional growth with Let's Progress.

Created by third-year students from the Department of Emerging Technologies at SB Jain Institute of Technology Management and Research, Nagpur. Let's Progress is our ambitious 6th-semester Mini Project. Amid various project ideas, we chose this endeavour with a singular goal – to elevate the academic performance of engineering students.

Key Features

Intuitive Dashboard

Visualize your academic performance at a glance with our user-friendly dashboard.

[Read more](#) →

Subject-wise Analysis

Drill down into detailed subject-wise analysis to identify strengths and areas for improvement.

[Read more](#) →

Student Profile

Keep track of your academic milestones and enhance the efficiency of your student profile.
